SMART LIGHTING TRENDS

BSI® Lighting Technologies follows smart, sustainable and ecologically responsible outdoor lighting principles using new technologies and best practices in lighting design and production.

We provide the most current research and information to our clients on smart lighting solutions based on their performance and real effectiveness.

Total lighting solution

BSI® Lighting Technologies lighting luminaires combine high technology and stylish design, from classic to modern, with high-efficiency LED technology.

Our portfolio brings in optimal lighting solutions for architectural, architainment, commercial and public applications. All products from urban, roadway lighting to residential, parking, area, pedestrian, tunnel & underpass, flood, landscape and indoor lighting are specifically designed to provide efficient visual comfort and enjoyment.

BSI® Lighting Technologies

BSI® Lighting Technologies, designs and manufactures creative lighting solutions for the international architectural lighting market.

BSI® Lighting Technologies is built on a solid basis of experience and a range of dynamic lighting solutions.

BSI® Lighting Technologies offers a wide range of services, from consultation and advice to architects and architectural lighting designers during the initial project design phase to helping to identify and develop technology solutions, customized products or custom-designed, project specific products.

Flexibility, simplicity, and innovation are our guiding principles. From software and product development, customization competence and cutting-edge integrated lighting and building material solutions, to worldwide project management, planning and support services, to our dynamic and global team of outstanding professionals, these values drive and shape us within our ever-evolving industry.

A Commitment to better lighting

The Company's core technology, innovative designs, and superior customer service enable the next generation of illumination continuing to change the way we light the world.

Committed to excellence

LED's have become a major highlight in today's lighting and entertainment industries. Our products will help you get the most out of this modern technology.

The company was created to complement a variety of design styles for urban, public, hospitality, retail, and residential spaces.

We strive to provide our clients with innovative designs, precision metal work and unique materials. BSI® is committed to energy efficiency in design and the use of renewable and reclaimable resources.

A new and fresh approach to lighting products and manufacturing

BSI® Lighting Technologies controls every aspect of the production process; design, development, manufacturing, and distribution. The result; high quality, from product performance to customer service.

Integrated development, production, and quality assurance

At BSI® Lighting Technologies; the product development location with planning, development, production, and quality control units are collected in one place.

Cutting-edge technology and artisan perfection in lighting

We created a new concept stands for artisan and trendy LED lighting luminaires with an appealing design and high-quality manufacturing.

Lighting solutions, in harmony with architecture and nature

We stand for innovative lighting technology and combined light expertise; from large-scale projects to customer project solutions.

We are the dynamic partner for high-quality lighting solutions

The comprehensive know-how of the BSI® lighting engineers stands for Quality Made in Turkey and the continuous optimisation of productivity, safety, health and energy-saving.

Engineered for quality

Throughout the entire production process BSI® Lighting Technologies distinguishes itself by handling the strictest quality parameters, to ensure products and services are designed and produced to exceed customer requirements. Every step in the production process has a routine quality procedure, covering both product quality and testing.

Solid experience

BSI® collaborates with landscape designers, architects, lighting designers, and lighting specifiers to develop custom lighting solutions specific to their needs. Having an in-house design staff increases productivity and gives the client all the tools necessary to bring their ideas to life.

BSI® supports all phases of the design process: from concept, through a collaborative design work-flow, to final realization within the architectural space. We offer 3D CAD modelling and photorealistic renderings to support each project.

Modified standard & custom solutions

BSI® Lighting Technologies collaborates at every step, offering perceptual ideas, creative suggestions and a problem-solving attitude.

Flexible and independent

BSI® is an independent and flexible supplier whose know-how and knowledge is operating in many industry verticals all over Europe, Asia, Africa and the Middle East. BSI® has the full flexibility and processes to cooperate with its business partners wherever they are located.

BSI® is committed to excellence and has a pragmatic approach to fulfil customer needs efficiently.

Total Lighting Solution

● Solar Lighting

BSI® solar smart lighting is a fully integrated vertical photovoltaic pole system, including solar panels with high-efficiency monocrystalline silicon solar cells, battery, charge controller, luminaire and solar PV pole. Whether used for smart cities squares and pedestrian areas, urban and residential streets or security lighting, it offers the ideal off-grid, on-grid or hybrid urban lighting LED lighting solution.

● Healthcare

BSI® Healthcare systems offer thoughtful, innovative lighting solutions with modern, energy-efficient LED lighting with advanced control systems. Innovative LED technology allows you to increase the well-being of patients and staff.

● Architainment

BSI® seeks pre-eminence in the architainment lighting market by consistently delivering practical, customer-driven lighting solutions. We aspire to be the lighting brand of choice of architects, designers, specifiers, contractors and installers in the process of shaping remarkable visual elements and surroundings.

● Accent

Architectural and accent lighting adds detail, dimension and colour to building facades and outdoor spaces. BSI® offers architectural accent lighting products for any need, including recessed, surface-mounted, flood, in-ground and wall LED lighting applications.

● Shop & Retail

Retail Lighting is one of the most diverse sectors in the lighting market and can be more subjective than most. At BSI® Lighting Technologies we understand that a bright and clean aesthetic is important for many to highlight merchandise to passing customers, while conversely, for some - particularly in clothing and fashion commerce, a particular aesthetic can be of as much importance as energy usage.

● Office

BSI® offers a wide selection of LED office lighting fixtures and control systems designed to meet the needs of modern workplace environments. Our LED office lighting fixtures are the ideal solution for offices of all sizes, providing exceptional light quality and addressing a range of complex lighting parameters while offering dramatic cost savings.

● Floodlighting

BSI® architectural floodlighting systems are engineered for general and dynamic accent, spot or flood lighting of large areas with a wide selection of optics. The products are suitable for applications where a powerful light output is required. The fixtures provide exterior long throw dynamic light for building facades, bridges, shopping malls, halls, hotels and sporting facilities.

Industrial

Industrial lighting fixtures from BSI® offers maximum efficiency and productivity. High performance LED High Bay and Low Bay fixtures providing higher reliability and energy efficiency in commercial and industrial lighting applications.

Light Elements & Bollards

BSI® Light elements and bollards are ideal for lighting up modern and architectural areas. They are designed to last in extremely harsh environments. With different direct or oblique or even diffused emission solutions, BSI® offers LED elements ready to meet various installations.

Underpass & Tunnel

Specially designed for slow or high traffic underpass lighting, BSI® LED fixtures combines elegance and style with high-performance lighting.

Wall Effect

Architectural wall luminaires with LED sources, combines brilliant LED light with straightforward design. High-quality LED lighting from BSI® provides you with all options for visual highlights that attract attention. The fixtures are designed to last in extremely harsh environments.

Urban & Area

BSI® offers a high variety of lighting fixtures with different optics, shapes, dimming and control options to suit any urban application with a consistent design language.

Modern, discreet and versatile post top LED lanterns integrate into the cityscape and residential areas with the various beams allowing optimum light distribution.

Custom Made

BSI® Lighting Technologies manufactures light concepts for indoor, urban and residential areas. The company is committed to excellence and has a pragmatic approach to fulfil customer needs efficiently.

BSI® supports all phases of the design process: from concept, through a collaborative design work-flow, to final realization within the architectural space.
